

revolutionEHR
freedom to focus

SIMPLIFY your practice

FOCUS on your patients

As a professional, you're in the business of caring for your patients. That's why you went into optometry.

You're not in the business of record keeping and accounting and maintaining complex IT systems. You didn't become an optometrist to spend your day fighting with computers and searching for paperwork.

RevolutionEHR is the only web-based complete practice solution. We're different from all the other vendors. Our solution is online. It frees you and your staff to focus on patient care. At the heart of our system is the Electronic Health Record, the most fundamental element of your patient care.

online **SIMPLICITY**

Most practice management and electronic health record solutions require that you invest in IT. Not only do you have to buy software, you have to buy new servers, storage, and backup. Then you have to pay someone to install the software and maintain the systems and network.

With RevolutionEHR, all you need is a computer workstation with Internet access:

You eliminate the expense and hassle of maintaining software, servers, databases, backups and extra hardware. Your data is secure with our servers and automatic data backups in our world class data center.

With traditional practice management software, there are extra costs for additional modules and software upgrades. With our web-based solution, all features are included and every update is automated on our end. This gives you seamless & instant upgrades with no extra cost or effort on your part.

You simply need a computer and Internet access. Retrieve your patient data while at home, traveling, or from any of your offices. The need for data synchronization between locations is eliminated. Use the computer of your choice – Windows, Mac, Linux, or even a combination.

Add locations, staff, workstations, patient records, and data storage at no extra charge. ►

***"RevolutionEHR
is user-friendly,
web-based,
and you don't
need an IT
department."***

VICTOR J. CONNORS, O.D.

NO more ***IT*** headaches

NO more ***HIDDEN COSTS***

ACCESS your data when and where you want

EQUIP your growing practice at no added expense

revolutionEHR
freedom to focus

"I love the fact that I can get at my patient records from anywhere. At home, on the road, in the office – I have access from my finger tips."

DORI M. CARLSON, O.D.

features

"RevolutionEHR was affordable for my brand-new practice. Not having to deal with servers and software installs was one less thing to worry about and made it an easy decision."

JUSTIN BAZAN, O.D.
